The front of Mr. Morton's house was cleborately decorated. But more eigelificant than all the decorations was the little hine flag with the coat of arms of the United States to white which flattered over the entrance.

It was the flag of the Commander-in Chlef of the Army and Nevy of the United States, commonly called the President's flag, and marked the headquarters of the chief officer of the nation. That flag is the only one of its kind, and only one man in the world can use it.

There will be a mite at Mr. W. D.

There are several around here who seem to be dissatisfied with the ojening of the present administration, and the reason thereof is a simple one. Thousands of voters were told and made believe that as soon as Harrison was brangurated and the "protectoe lariff system" made seemer for four years, it would have such a decided influence as to immediately make times better. Now some of those voters are saying its just the reverse. We could give the name of one who has always stood by the g. o. p., but now renounces his alleglance simply because it has proved to be a deception. "It is useiess to proiong this Interview," he said, coming to his feet. "You would distrust one even if he, were to swear on n mountain of Bibles. I am sorry, but in time I shall be able to prove to you that I am a much-nhused man."

"He told me that it was somewhere within the walls of Lone Hollow, and I mean to find it and confound them all."

Then Lura went to the room where her wounded cousin lay. When Mrs. Penroy saw the girl she uttered a scream and fell fainting to the floor.

MISS JOYCE'S MISSORTHNE

Grace improved rapidly, and was seen able to sit up, although the doctor advised quiet and no attempt at exertion, until she was fully recovered, since a reaction might

weeks regarding the will of the late Mr. Vandible, on account of the illness of important witnesses. Lura Joyce had succeeded in gaining this concession from the court in spite of the covert opposition of Captain Starhright and his attorney.

"The will is a fraud, and can be proved so if you will wait until the young Miss Penroy and her mother are able to appear," declared Lura, and so once again was the scheming Captain thwarted. He understood to whom he owed his non

snccess, and the hitter feeling in his heart for the hrave young girl deepened into absolute hatred.

Miss Joyce often visited Stonefield in the interest of the young mechanic, who lay in the county jail waiting the outcome

of Grace Penroy's Is jury.

It was an outrage not to permit bail, Lura Joyce declared, and the young man innocest, too. The Captain and his attorney, however, masaged to have the bail fixed at

such a high figure that none of Austin Wentword's friends could aid him, and so the mechanic, wholly innocent as the reader knows, las guished in jail. The testimony of Captain Starhright before the justice in whose court Wentword had his examinstion was positive against the prisoner, and as the Captain was a prominest citizen there could be so doubting his oath

Lura Joyce fretted at this not a little, but, finding that nothing could be done to rescuo the young man from prison ustil freed hy due process of law, she gave up the case and turaed her thoughts and efforts in another shaped.

forts in another channel.

Mrs. Penroy was soon able to attesd upon the wasts of her daughter, thus leaving Lura Joyce more time to herself.

"I believe Captain Starhright is at the bottom of all this iniquity," declared Lura one day to Grace. "You, of course, know that Austin Wentword is innocent of an at-

tempt on yoar life." "Certalsly," assured Grace. "He and I

were standing together when the shot was fired by some ose in amhnsh." Well, you shall testify to this in good time. I have a surprise in store for Clinton Starbright that will take him down a peg when he comes to chew on it; and, mind you, Grace, the villain shall begin the mas-tication before he is many daya older."

"I am not sure but what you wrong the Captais," said poor little Grace, with a faint, sad smile. "He has been very kind to me during my lliness." "Kindi All put on, my dear, every bit of

it," declared Lura, quiekly.

Te this the invalid made no reply. As she sat supported by pillows in a great armchair she presented a pretty

picture, that even her more boisteraus cousin could not fail to admire. "You will soon be strong again, dear," said Lura. "It seems is credible that such an accident should come to one so good as you are, Grace. Somstimes I think that It was an accident. You see, I am sentimenta

like other girls, once in awhite." Then Lnra gave vent to a sharp little laugh and sprasg to her feet, gliding swiftly from the room.

On her way to Stonefield that very day on the stage the herses became frightened and ran, the stago was overturned, and several of the passengers injured, among them Lnra Joyce.

"Confound the luck!" exclaimed the girl, when she found her ankle sprained so severely as to prevent her bearing her weight on lt. "I'll never ride in that stuffy old coach again. This serves me right for not going on my own cosveyance—the back of Romeo."

Tho driver secured a farmer's wagon, in which he conveyed his passessers to the city. Miss Joyce found shelter at the house of a friend, where, to her chagrin, she was compelled to remain for several days on account of her injuries.

While here she was visited by a grave-lcoking gentieman of thirty, whose sober face and quiet manners were la direct con-trast to the bubbling exuberance of Miss Joyco. This gentleman was Dr. Colton, really the most learned and gifted physician in the city. That he was a friend of Lura Joyce was proved from the cordial nature of their meeting.

"How is your patient, Dr. Coiton?"
This was about the first words after a good hearty hand-shake. Lura, with one foot swathed resting on a hassock, reclin-ing caimly in a huge rocker, was an interesting picture. The grave, dark eyes of the young doctor evinced their admiration by the earnestness of their gaze.

"My patient is fast gaining, and will soon "My patient is fast gaining, and will soon be sound as a dollar—my old patient, hut as to my young one that remains to be seen," and Lura actually blushed under the affectionate earnestness of his gaze.

"So you heard of my little tumble!" she retorted, quickly. "I had no idea that I nhould require the services of a physician."

"That remnins to be seen."

Lura realized that he was in earnest, how-over, and she groaned inwardly at the pros-pect. What might not happen during her absence from Lone Hollow!

There seemed to be no help for it, however, and poor Lura resigned herself to a fortnight's imprisonment with the best grace possible. She had no thought of disputing the wisdom of Dr. Colton's diagnonis. To Lura his word, of all men in the world, was law. She regarded Arthur Colton as the wisest man on the globe, and

Colton as the wisest man on the globe, and as good as he wan wise. She always felt her inferiority while in his prenence, and tills often embarrassed her so that who nhrank within herself and ceased to shino with the full glow of her vivacious womanhood. It was into one afternoon of a cold day in autumn that Lura Joyco dismounted from the ntage at Lene Hollow. Three weeks had elnpsed since she left by the same conveyance, and during that time not a word had reached her from the lumntes.

"They might all be dead for nll the stir they make," mused the girl, as she glanced up at the curtained windows and solemn gray walls of the old house. "I wrote, but not one had the courtesy to auswer. It neems to me thut Grace ought to be out be-fore now."

The girl tripped nwiftly around to a spot where she could view the window of Grace's room. She saw nothing of her cousin, and at once retraceil her steps, a atrange misgiving at her heart.

Captain Starbright started at seeing Lura
